Work Experience

Codex Community Hackathon

June 2026

Team Lead (3rd Place)

Hanoi, Vietnam

- Led a team of **3 developers** to deliver **GuideLens AI**, winning **3rd Place** in the Codex Community Hackathon
- Designed and implemented **RESTful APIs** using **FastAPI** for image upload, AI inference, and annotation generation
- Integrated the **OpenAI Vision** model with **Pillow** to generate coordinate-based UI guidance from screenshots
- Containerized frontend and backend services using **Docker Compose** for local development and deployment

PathTech JSC

January 2026 – April 2026

Full Stack Developer Intern

Hanoi, Vietnam

- Developed backend services for a real-estate auction platform using **NestJS**, **PostgreSQL**, and **Redis**
- Implemented **JWT authentication** and role-based authorization for protected REST APIs
- Integrated **Stripe Payment Intents** and webhook handlers for secure online transactions
- Designed and implemented **RESTful APIs** for apartment listings, reservations, and bidding workflows

FreeCode School

July 2024 – December 2024

Software Engineer Intern

Hanoi, Vietnam

- Developed **CRUD RESTful APIs** using **Spring Boot**, **Spring MVC**, and **Spring Data JPA**
- Implemented **request validation**, global **exception handling**, and standardized JSON API responses
- Collaborated with frontend developers to integrate APIs, debug data flow issues, and resolve API mapping problems

Teky Academy

January 2025 – Present

Programming Lecturer

Hanoi, Vietnam

- Taught **Java**, **OOP**, algorithms, and basic web development to students through project-based learning
- Mentored students in designing and building small-scale applications while promoting clean code and problem-solving practices

Projects

Identity Services | Source Code

Java | Spring Boot | MySQL | Spring Security | JWT

- Built a secure **RESTful authentication service** using **Spring Boot** with **Spring Data JPA** and **MySQL**
- Implemented **JWT authentication** with access token, refresh token, token revocation, and logout mechanisms
- Designed **role-based and permission-based authorization** using **Spring Security** and **@PreAuthorize**
- Applied **BCrypt** password hashing, Bean Validation, DTO mapping with **MapStruct**, and global exception handling using a custom **AuthenticationEntryPoint**

Technical Skills

Languages: Java, Golang, Python, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, NestJS, FastAPI

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools: Git, GitHub, Maven, Docker, Postman, Swagger, GitHub Copilot, OpenAI Codex

Certificates

CS50x: Introduction to Computer Science | Harvard University

IELTS 7.0 | IDP Education

Java (Basic) | HackerRank

Education

Ha Noi University of Mining and Geology

Expected Graduation: January 2027

Bachelor of Information Technology Engineering

Hanoi, Vietnam

- Merit-based Academic Scholarship (1 Semester) – Semester GPA: **3.67/4.0**
